Gelsenkirchen, 15.03.2019

TEST CERTIFICATE according to the KTW Guideline (issue date: 07.03.2016)

Product: PTFE Tube TSRV4-9 (white / transparent)

Specimen: Tube ED 7,3 mm ID 5,3 mm white / transparent, coil 20 m

The above mentioned product was tested according to the Guideline on the hygienic assessment of organic materials in contact with drinking water of the German Environment Agency. Pursuant to the test report-no.: **K-310429-19-Bs/st** dated **15.03.2019** the product meets the requirements for the product group:

Pipes with DN < 80 mm in contact with 23 °C and 85 °C.

All product groups for which the requirements are met are summarised on the back side.

The certificate is valid providing that the requirements, laid down in the Guideline regarding the testing of the microbial growth are fulfilled. This can be verified for the product f.e. with a valid test certificate according to the DVGW technical rule W 270.

This test certificate is valid beginning with the date of issue and is ending by **15.03.2024**. The test certificate may be extended for further five years, provided that the formulation, the relevant evaluation criteria (restrictions in the positive lists), the production process and the production place of the product have not changed.

The Director of the Hygiene-Institute
on behalf of

Dr. rer. nat. Andreas Koch
Head of the Dept. for water
hygienic material testing

The assessment was based on the assumption that the used starting substances and monomers used to manufacture the product may completely known and no other substances are present in the product. The validity of this document expires in case of modifications in the composition of the product or the processing conditions. The results and evaluations refer to the groups of test items. This document may not be published without our written permission only complete and unchanged or duplicated.
